# SNAKE GAME
Rules

How To Play:

The objective of the snake game is to use the arrow keys to move the "snake" around the screen. The snake grows in size as it consumes the randomly generated food that it finds. The snake will also randomly spawn anywhere on the screen after it eats the food. If the snake leaves the screen or bumps into itself, THE GAME IS OVER. Your snake should as big as it can be to SURVIVE.

Set Up:

WARNING! You must install Pygame and all other files (images/sounds) that come with the game in python to play.

1. You must use arrow keys on the keyboard to move the snake

2. The snake CAN move backwards

3. You lose if the snake bumps into itself or leaves the screen

4. GOOD LUCK & HAVE FUN
